

# Edit Extension Ring Time

Editing the Ringtime allows one to lengthen or shorten the number of times an extension rings before going to the next destination.

\*This procedure requires administration level privileges.

1. Login and go to Extensions > System
2. Edit the extension in question
3. Scroll down the page to the call properties section
4. Change the value of the Ringtime (sec) field to the value of your choice. Default 32 seconds / 6 rings
5. Click the save button.

The screenshot shows the 'System' settings page for an extension in the Ux system. The left sidebar contains a navigation menu with 'System' highlighted. The main content area is divided into several sections. The 'Call Properties' section is highlighted with a red box and contains the 'Ringtime (sec)' field, which is also highlighted with a red box and contains the value '32'. Other fields in this section include 'Area Code', 'Incoming Dial Options', and 'Outgoing Dial Options'. The 'Groups' section contains 'Call Group' and 'Pickup Group' dropdown menus. The 'Default Trunks' section is partially visible at the bottom. The right side of the page contains various other settings, including 'Hide from directory', 'Rings to answer', 'Voicemail Delay (sec)', 'Timezone', 'Speakerphone Page Auto-Answer SIP Header', and 'Custom SIP Header'. A 'Codecs' table is also visible on the right side.
