## Communicator GO- MAC OS, Granting Necessary Permissions.

If you have a problem with using a microphone or camera with Communicator meeting on Mac OS please check security options described in this section.

Communicator needs permission to:

- Camera for video communication.
- Microphone for audio communication.
- Screen Recording and Accessibility for screen sharing and remote control.

The user can enable these options by going to: Settings  $\rightarrow$  Security and Privacy  $\rightarrow$  Privacy.

If the necessary permissions for camera and/or microphone have not been granted, the user will see a dialogue asking them to grant the permissions. There will also be a red exclamation mark next to the icons in the option bar.

Here you will find the options to enable your camera and microphone.
