

Communicator Meeting – Removing Co-Organizers

To remove a participant from being a co-organizer, it is possible by clicking on the “-” button that is in line with the co-organizer name. This way, the Co-organizer role will be removed from that participant, and the option Assign co-organizer (“+” button) will be available again, allowing you to assign the role again to the same participant if needed.

The screenshot shows a dialog box titled "Add participants" with a search bar at the top. Below the search bar, there is a list of participants. The first participant is "Lejla (1001)". The second participant is "Oliver Smith (1003) [Co-Organizer]". The third participant is "Emily Parker (1004)". A red box highlights the "Oliver Smith (1003) [Co-Organizer]" entry. To the right of this entry, there is a minus sign (-) and a close button (X). A red arrow points to the minus sign, and a tooltip labeled "Remove Co-Organizer" is visible next to it. At the bottom right of the dialog box, there is a blue "Save" button with a checkmark icon.
