

System Operation Times – Access Codes

System Operation Times allows the system to run based on a date and time schedule. This can be enabled to run automatically with no user intervention or manually through the use of access codes.

Note: System Operation Times must be enabled on the extension from which you would like to set the System Operation Times. Please see [Enhanced Services](#) for more information.

Open System Operation Times

To set the system mode to Open a user can dial ***401** or press a preprogrammed button. Once the company is opened, the system will follow the scheduled destinations that are marked as open times.

Close System Operation Times

To set the system mode to Closed a user can dial ***402** or press a preprogrammed button. Once the company is closed the system will follow the closed destinations. If none are programmed the system will ring the default destination.

Reset System Operation Times

A user can dial ***403** to reset the systems' Operation Times and restore the rules entered in Settings.

Midnight Reset

A user has the ability to set the Operation Times midnight reset option to one of the following options.

- Yes: The system will be reset at midnight,
- No: The midnight reset will be skipped
- Not Set: If the option is set this would be as if the midnight reset was set to Yes

Enabling or Disabling Operation Times on a Specific DID

You may apply operation times to a DID specifically, while not affecting other System Operation Times setting.

1. To Open a specific DID one would dial ***401+DID**
2. To Close a specific DID, one would dial ***402+DID**
3. To reset a specific DID one would dial ***402+DID**

Example: The user would like to set the Operation Times for telephone number 1323-465-6722. The user would dial *40113234656722 then Send or Dial.
